Ogdensburg-Prescott International Bridge Toll Collection System Goes Live

Bridgeport, PA – April 15, 2016

E-Transit designed and deployed a complete toll collection system for this 4-lane bridge. Each lane is equipped for manned and unmanned operation.

The system includes lane controllers, Linux based plaza/host server (with toll collection system management functions as well as ETC back-office/CSC applications), touch screen toll terminals, sunlight readable LCD patron fare displays, receipt printers, barcode readers, 4-Strip treadles, digital video audit system, integration of multiple legacy payment methods, including multiple types of proximity cards and barcoded tickets.

Specialized functionality to allow for unique round-trip discount programs, special processing for US Customs personnel, etc.

About E-Transit:

E-Transit is a leader in information and control systems for the transportation, ports, and security industries. Our team includes experienced systems professionals who provide consulting, hardware/software design, and system integration services for intelligent transportation, security, toll and revenue collection, point of sale, industrial control, and auditing applications. We use off-the-shelf components, standardized communication protocols, open computing systems, and conservative design practices.

The Company has ongoing projects and installations in the USA, and abroad. The company E- was founded in 2000 and operates from offices in Bridgeport, Pennsylvania (approximately 20 miles from Philadelphia).
